

THE DAWN OF INDIAN MANUFACTURING - KNEST MANUFACTURERS

The sign of the times is growth. With a robust Capex cycle in sight and a buoyant recovery of the real estate sector, the outlook is certainly positive. And if this backdrop was a jigsaw puzzle, Knest Manufacturers is the centrepiece.

Knest Manufacturers is an aluminium formwork company that provides building solutions for real estate and infrastructure development. Made in India, Knest was founded in 2014 with the fundamental idea of helping realtors & developers. It has grown to become India's largest and the world's fastest-growing formwork company.

The vision is to make real estate & infra development efficient, sustainable & scalable.

Anchored by the country's largest manufacturing capacity, Knest guarantees the finest quality of product, best-in-class delivery timelines, and exceptional after-sales service & support - all to empower you to reach your business goals. With a growing global footprint of over 5 countries and a 100% delivery record, Knest is taking India to the World.

Since its inception, Knest has led the industry with breakthroughs like 3D Virtual Reality visualisation of project designs & flagship offerings such as Single Extrusion Panels & Aluminium Formliners.

'Technology, Design, and Innovation' are the three pillars that shoulder the endeavour of revolutionising construction in the world. And Knest aspires to achieve this by walking hand-in-hand with the environment. By reducing the use of wood, creating reusable panels, and recycling the scrap, Knest makes your project a contributor to the larger goal of sustainable development.

There are two divisions within the company - "Knest Aluform" produces monolithic panels used in the construction of large projects, while "Knest Verticals" produces smaller modules of construction for individual developers, offering them affordable & flexible solutions while still maintaining the advantages of Aluminium Formwork.

Nitin Mittal
Chairman and MD

The magic happens out of a state-of-the-art, automated factory in Pune, India. It has a massive expanse of more than 400000 sq. Ft. which houses industry-leading machines such as Friction Stir Welding, Robotic Arms, Plasma Cutting, and much more.

As they rally behind the slogan 'Desh Mein Bana Desh Ka Apna', the ambition is to make a truly Indian multinational.
